

Environmental Policy

Dollar General is committed to being a good neighbor and responsible steward of natural resources. As we grow our business, we continuously explore ways to further reduce and limit our impact on the planet while balancing operational and customer needs. Our goal is to reduce our environmental footprint through sustainable and business-friendly practices to help ensure the communities we call home remain vibrant for generations to come.

As part of our efforts to reduce our environmental footprint, we plan to:

- Comply with applicable environmental laws and regulations
- Consider and, where relevant to our business and in the long-term best interests of our shareholders as a whole, incorporate third-party environmental policies, practices and expectations
- Monitor our Scope 1 & 2 greenhouse gas (GHG) emissions and work to meet or exceed previously set GHG emission reduction targets
- Work to expand our use of renewable energy
- Explore new ways and continue on-going efforts to advance recycling, repurposing, reusing or reducing certain products and materials within our operating model
- Communicate relevant aspects of the Company's environmental performance both internally and externally

Governance

The Nominating, Governance & Corporate Responsibility (NGCR) Committee of the Company's Board of Directors has primary responsibility for oversight of management's efforts on significant issues relating to corporate social responsibility and sustainability, which may include efforts related to environmental stewardship. The Audit Committee has responsibility for oversight of the Company's enterprise risk management program, and Environmental, Social and Governance (ESG) related issues are considered in connection with that program. The Company's Sustainability Committee meets at least quarterly and is comprised of members of the executive leadership team and the Vice President of Corporate Social Responsibility and Philanthropy.

Compliance

Dollar General is committed to complying with applicable federal, state, and local environmental laws and regulations. Certain goals and actions of the Company may go beyond what is required by law in furtherance of our mission of Serving Others.

Products

Dollar General is a leader in the value retail sector, providing customers with everyday products at great prices in a convenient, easy-to-shop neighborhood general store. Providing an assortment of safe, affordable, quality products that are inclusive of a variety of consumer needs and preferences is an important part of our commitment to our customers and their families. We strive to ensure that our vendors and manufacturers and the products they provide us meet or exceed applicable safety, quality, and regulatory standards, including those relating to product ingredients and components, labeling and packaging.

Chemicals Management

As part of our efforts to serve our customers and ensure product quality, we have implemented a chemicals policy and restricted chemicals list. Dollar General's chemical policy and restricted chemicals list are designed to go beyond what is required by law and take additional steps to reduce or eliminate

certain intentionally added chemicals of concern from certain of our formulated products. Our chemical policy can be found here (include link).

Stakeholders & Communications

Dollar General understands that environmental efforts are important to a variety of internal and external stakeholders including but not limited to employees, customers, shareholders, vendors, and the communities we serve. As such, we communicate on-going efforts both internally and externally through a variety of channels including but not limited to town hall meetings, our internal website for employees, Corporate Social Responsibility page of Dollar General's website, and the publication of an annual Serving Others report. Additionally, our management team works to ensure that the Board (and/or an applicable committee of the Board) is aware of shareholders' perspectives that are communicated to Dollar General, including perspectives related to environmental matters, both generally and when appropriate to inform decision-making.
